NO-NAIL BOXES: effective safety management recognised

Wiltz, 20 June 2018.

Health and safety are an integral part of NO-NAIL BOXES’s CSR (Corporate Social Responsibility) approach. For many years, the company has had in place a series of measures for effectively managing workplace health and safety. A policy that improves not only employee working conditions, but productivity and, above all, product quality!

“We want our staff to work safely. We are implementing measures such as appointing, as required by law, a safety officer. Their mandate is to provide workplace health and safety information, conduct risk assessments and introduce the measures needed to eradicate potential sources of danger. On a regular basis, we hold various health-oriented training and information sessions (noise, backache, etc.) for our employees”, explained Director Michèle Detaille.

Two tangible improvements

In February, a bridge crane was installed in the NO-NAIL BOXES’s pallet zone. Its purpose is to make it easier for the operators in this zone to work, especially when it involves handling heavy or cumbersome pallets.

On the assembly machine for our ISIBOX folding boxes (photo opposite), the maintenance unit has perfected the existing safety system to ensure maximum employee integrity. The operator must now press a safety button to allow their co-worker to operate the press. A camera has also been added. As such, the employee operating the press will have a clear view of their co-worker.

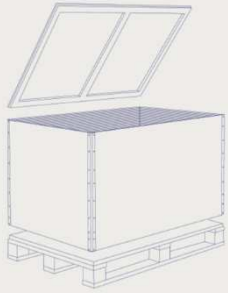

A policy that has been rewarded

Since 2014, these provisions have earned NO-NAIL BOXES “Sécher & Gesond mat System” certification. This label was renewed this year! Issued by the Association d’assurance accident (AAA) [Accident Insurance Association],

this label undergoes partial reassessment every year and total reassessment every 3 years.

All ALIPA Group companies based in Wiltz are now “Sécher & Gesond mat System” certified: CODIPRO, LIFTEUROP and AllPack Services.

Established in Wiltz, No-Nail Boxes has been manufacturing folding plywood and steel crates for industry since 1961. Every year, some 300,000 cases, 90% of which are tailor-made, come out of its production lines. Certified ISO 9001 and 14001, AEO, PEFC, CSR, SuperDrecksKëscht fir Betriber and Dry at Gesond mat System, No-Nail Boxes is integrated in the packaging division of the ALIPA Group, a Luxembourg specialist in industrial packaging and lifting, which counts at total about 130 employees.
