

Press Release

Wiltz, 24th of January 2014.

NO-NAIL BOXES extends its range with the BOXMOD.

NO-NAIL BOXES proudly presents the newcomer to its range of **folding plywood boxes for industry: the BOXMOD.**

The BOXMOD is specially designed to optimise the packaging/volume ratio. The unused height of the box can be cut off and reused to form a new box by combining it with a pallet and a cover.

It also has many advantages: height-adjustable on site, practical, economic, delivered and stored flat, lightweight, robust and easily recyclable.
