(For immediate release)

## NO-NAIL BOXES works for the defence sector

Wiltz, 04 November 2019.

Hazardous materials packed in collapsible plywood boxes? It's exactly the solution NO-NAIL BOXES has come up with. This company offers collapsible boxes made from plywood and steel. For more than 55 years, NO-NAIL BOXES has been sharing its expertise with the defence and security industry. It's a sector where discretion and confidentiality are essential.

Regardless of what needs to be packaged (hazardous materials, high-value products, etc.), NO-NAIL BOXES evaluates every project and offers customised packaging adapted to its clients' products.

### Army-coloured boxes

NO-NAIL BOXES offers several customisations suited for the defence and security sector, available in a wide array of colours: RAL + RAL NATO 6014 - 6031 + infrared paint (PIR). Our collapsible boxes can also be customised with logo printing, pictograms, sequential marking, etc.

### Guaranteed discretion

ISO 9001 and 14001 certified, amongst other things, NO-NAIL BOXES holds several credentials in the defence and security sector. In an industry where discretion and confidentiality are essential, the company works in the best interest of product development, limiting the disclosure of information to those with a legitimate need to know. To protect against cyber threats, the company has also implemented cybersecurity measures to guarantee information safety and data protection.

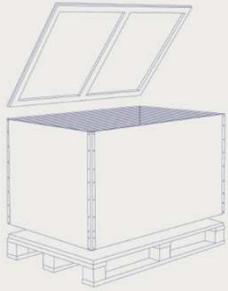

### Products approved by an authorised body

To meet defence and security industry requirements, NO-NAIL BOXES offers accreditation for boxes used to transport hazardous materials and products.

More than 50 approved 4DV (plywood box) models are available, some able to hold up to 400 kg of hazardous material. These boxes comply with the current regulations in effect: ADR for road transport, IATA for air transport and IMDG for maritime transport.

The company has its own design office, which is responsible for the overall management of a certification project: research, specifications and production of prototypes that include decoys for drop tests, etc. The company is equipped with its own drop-test station for evaluating boxes used to ship regulated materials. The tests are overseen by authorised bodies: IBE, BVT LNE and BAM.

Established in Wiltz, No-Nail Boxes has been manufacturing folding plywood and steel crates for industry since 1961. Every year, some 300,000 cases, 90% of which are tailor-made, come out of its production lines. Certified ISO 9001 and 14001, AEO, PEFC, CSR, SuperDrecksKëscht fir Betriber and Dry at Gesond mat System, No-Nail Boxes is integrated in the packaging division of the ALIPA Group, a Luxembourg specialist in industrial packaging and lifting, which counts at total about 130 employees.
